ADENOMAS

- Computer-aided detection, mucosal exposure devices, their combination, and standard colonoscopy for adenoma detection: a randomized controlled trial
- Impact of withdrawal time on adenoma detection rate: results from a prospective multicenter trial
- Top tips for endoscopic ampullectomy of sporadic ampullary adenoma

ARTIFICIAL INTELLIGENCE

- Usefulness of a novel computer-aided detection system for colorectal neoplasia: a randomized controlled trial
- Development and validation of a machine learning-based model for varices screening in compensated cirrhosis (CHESS2001): an international multicenter study
- Development and validation of artificial neural network model for detection of Barrett's neoplasia: a multicenter pragmatic nonrandomized trial (with video)

EMR

- Impact of margin thermal treatment after EMR of giant (≥ 40 -mm) colorectal laterally spreading lesions
- Underwater versus conventional EMR for nonpedunculated colorectal lesions: a randomized clinical trial
- Impact of margin ablation after EMR of large nonpedunculated colonic polyps in routine clinical practice

EUS

- Prophylactic EUS-guided gallbladder drainage prevents acute cholecystitis in patients with malignant biliary obstruction and cystic duct orifice involvement: a randomized trial (with video)
- *Editorial:* Prophylactic EUS-guided gallbladder drainage: Are we doing too much?
- The role of through-the-scope catheter-based EUS in inflammatory bowel disease diagnosis and activity assessment
- Comparison of EUS-guided ablation and surgical resection for nonfunctioning small pancreatic neuroendocrine tumors: a propensity score—matched study
- Top tips in EUS elastography (with video)
- Analysis of variation in learning curves for achieving competency in convex EUS training: a prospective cohort study using a standardized assessment tool
- Telecytology versus in-room cytopathologist for EUS FNA or biopsy of solid pancreatic lesions

PANCREATITIS

- Soft self-expanding metal stent to treat painful pancreatic duct strictures secondary to chronic pancreatitis: a prospective multicenter trial
- *Editorial:* Something positive from something negative

PERORAL ENDOSCOPIC MYOTOMY

- Impact of peroral endoscopic myotomy on high-resolution manometry findings and their association with the procedure's outcomes
- Technical details and outcomes of peroral endoscopic myotomy with fundoplication: the first U.S. experience (with video)
